

# User Guide

Cashin is a clean and easy application for monitoring your economy. You can create your own budget, by yourself or with the help of our suggestions, and then adding transactions compare it to your real life incomes and expenses. Cashin provides a fun and simple way of reaching a sustainable economy.

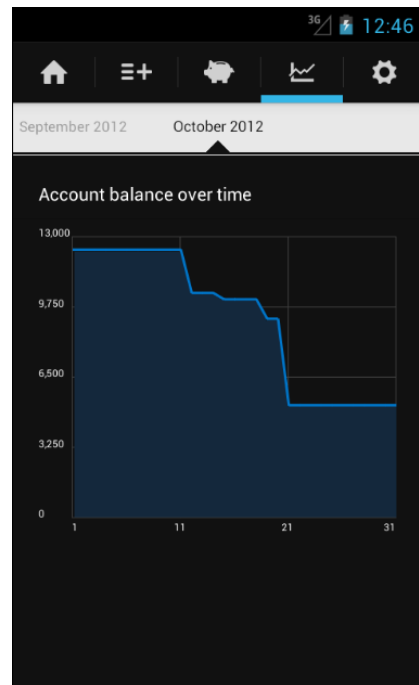

## Cashin gives you:

- A quick overview of your account balance and how much money you have left of your budget.
- A possibility to create a budget with different categories of incomes and expenses, and then add the real life transactions you make with some quick taps.
- An easy category system where you can make your own categories.
- Graphs and bars to visualize your economy and account balance over time.
